

BREWERY OF THE MONTH

**Manhattan Project Beer Co.
Dallas, TX**

Half-Life (draft)

Upon first sip, you will immediately pick up on the citrus characteristics. Soon to follow will be stone fruit and pine. But this is not a bitter IPA, friends. It is perfectly balanced with a focus on the delicious aroma. Half-Life finishes with a subtle and wheaty breadiness.

ABV: 6.2% IBU: 33

Necessary Evil

Our version of a Pilsner is dry, crisp, and has a hint of hop character. The floral aspects of the hops, not the bitter, so please make sure that H word is never mentioned to your light beer friends.

ABV: 5.3% IBU: 30

Plutonium - 239

Do you like the coconut Girl Scout cookie? And do you like coffee? If your answer is yes to both, then this is your beer.

Plutonium 239 might be our most memorable beer. At first sniff, you will immediately detect coconut, chocolate, and a wonderful roast. Like all good Porters, the carbonation is low and the body is medium.

ABV: 6.2% IBU: 25
